BHARATCONNECT

Empowering India, In Every Tongue.

An AI-powered multilingual communication assistant for more natural, seamless conversations across Indian languages.

THE PROBLEM

India's linguistic diversity is a strength, but it can create everyday communication barriers. Travellers may struggle to ask for directions, speak with vendors, understand public transport, or request help in an unfamiliar language.

Traditional translation tools can translate individual sentences, but natural conversation needs more: accurate speech recognition, preserved context, and a smooth exchange between speakers.

OUR SOLUTION

BharatConnect is an AI-powered voice communication assistant designed to bridge language barriers between people speaking different Indian languages.

It aims to understand the speaker's intent, preserve the intended tone, correct likely speech-recognition errors using context, and support continuous two-way conversations.

THREE CORE FEATURES

01
INTENT- & TONE-AWARE TRANSLATION

Conveys what the user means in the requested language and tone—not merely word for word.
Example: “Politely ask where the bus stand is” becomes a natural, polite Kannada request.

02
CONTEXT-AWARE SPEECH CORRECTION

Uses audio evidence and conversation context to spot likely recognition errors involving similar-sounding words, names, or mixed-language speech. If uncertain, it asks rather than guessing.

03
CONTINUOUS TWO-WAY CONVERSATION

Lets two people speaking different languages keep talking naturally, translating each person's response without repeatedly restarting the process.

HOW IT WORKS

01 · LISTEN
Gnani AI Prisma
Speech-to-text

02 · UNDERSTAND
LLM / Gnani AI Evon
Intent, tone & context

03 · SPEAK
Gnani AI Timbre
Text-to-speech

WHO IT HELPS & WHY IT MATTERS

TRAVELLERS & TOURISTS
Easier everyday interactions in unfamiliar states.

STUDENTS & PROFESSIONALS
Simpler communication across language boundaries.

LOCAL COMMUNITIES
More natural interactions with visitors and newcomers.

OUR VISION

Make language a bridge, not a barrier.

Different Languages.
One Conversation.
